Professional Summary

Computer Science student with experience developing REST APIs using Java, Spring Boot, Python, and PostgreSQL. Built backend applications with JWT authentication, Docker, and automated testing, supported by professional QA experience documenting defects and verifying fixes.

Education

Bachelor of Computing Science, Expected 2028 — Kamloops, BC
Thompson Rivers University — **Dean's List — Fall 2024, Winter 2025, Fall 2025**

Personal Projects

QA Agent | *Python, FastAPI, pytest, GitHub Actions* | GitHub — September 2026 – Present

- Developing an AI-assisted API testing tool in Python and FastAPI that generates and executes test cases from business rules and API specifications.
- Integrated NVIDIA Nemotron through Nebius Token Factory to analyze business rules and support test planning.
- Automated pytest testing with GitHub Actions across four Python and OS configurations on push and pull requests.

Inventory System | *Java, Spring Boot, Docker, PostgreSQL* | GitHub — August 2026 – October 2026

- Built REST APIs with Spring Boot for inventory management, integrating a PostgreSQL database and authentication plus admin/staff authorization
- Debugged application and database issues, implementing validation logic and business rules to enforce inventory transaction integrity.
- Created JUnit and Mockito unit tests to verify stock updates, reject insufficient-stock withdrawals, and prevent transaction records when stock movements fail.
- Containerized the Spring Boot application and PostgreSQL database using Docker Compose for consistent setup across environments.

Experience

QA Analyst — April 2026 – July 2026
Great West Radon — *Calgary, AB*

- Documented and communicated 470 defects with reproduction steps, expected and actual results, screenshots, and severity classifications; collaborated with developers to verify fixes through retesting.
- Validated new features and executed regression testing across 3 user roles to prevent production defects.

Technical Skills

Languages: Java, Python, JavaScript, SQL
Frameworks: Spring Boot, Spring Security, FastAPI
Databases: PostgreSQL, MySQL
Testing: JUnit, Mockito, pytest, Postman
Tools & CI: Git, GitHub Actions, Docker, Maven

Personal Interests

- **Outdoor activities:** Skiing, surfing, dirt biking, and golfing.
- **Travel:** International travel experience across Thailand, the United States, Spain, Taiwan, Mexico, and Malaysia.
